

Simplifying Fuel Supply and Logistics Across North America

ENERGY MANAGEMENT REQUIRES COMPLEX DECISIONS

Should you install backyard bulk fuel tanks, hire mobile refuelers to fill trucks overnight, or issue fleet cards for purchasing fuel on the road? What about biofuels, renewable diesel, or compressed natural gas? How will you manage price risk? Most importantly, will you have the insight and visibility across fleet operations to drive efficiencies and cost savings? **For over 60 years, Mansfield Energy has partnered with leading fleets across North America to help them solve these questions.**

North American Fuel Supply and Logistics

LEADING FLEETS RELY ON MANSFIELD

As the trusted partner to over 5,000 customers from commercial and industrial fleets to government agencies, Mansfield helps organizations execute innovative procurement strategies and navigate the complex energy supply chain to operate more efficiently and uncover new ways to save costs.

SIMPLIFY FUEL MANAGEMENT

Mansfield delivers over three billion gallons annually to customers in all 50 states and Canada. Processing almost 40,000 price changes daily,

we offer you the ideal balance between supply reliability and price optimization. We optimize fuel prices by drawing from our diversified supply portfolio, which includes:

- Mansfield-owned fuel inventory
- Refiner and pipeline contracts
- Rack purchases

Each purchase is made with one goal in mind — lowering your fuel costs, regardless of where or how you fuel.

Reduce Fuel Costs

True energy management extends across the fuel supply and logistics value chain to generate meaningful cost savings. It's time to move beyond the status quo of fuel bids that save fractions of a penny per gallon.

Mansfield will help you develop a comprehensive fuel management strategy. As a fueling mode neutral supplier, Mansfield will help you reduce fuel management costs by incorporating all the major fueling methods into your fuel procurement strategy, including:

- Retail fleet cards
- Cardlocks
- Mobile fueling
- Bulk fueling

We provide customers a single integrated platform for total visibility across all fueling modes. Optimizing across fueling modes and having better insights, drives improved decisions that lower supply costs and drive operational efficiencies.

BUILDING RELATIONSHIPS THAT MATTER

At Mansfield, relationships matter. We value the trust our customers place in us and work hard to earn that trust every day. Mansfield has built long standing customer and supplier relationships across North America in virtually every commercial and governmental transportation sector.

These relationships are the result of putting our customers first – with the constant goal to provide reliable fuel supply and expert logistics. To respond

to our customers' daily needs, Mansfield provides 24/7 customer support from our operations centers located across North America.

BROAD PORTFOLIO OF PRODUCTS AND SERVICES

Mansfield offers an unmatched portfolio of products and services designed to take the cost and complexity out of fuel procurement:
